

### BIRMINGHAM, ALABAMA

Total Height: 130' | Branch Length: 4' - 10'  
Branches Per Foot: 2.5 | Total Branches: 165  
Branches Start Height: 60' above ground level

### DURHAM, NORTH CAROLINA

Total Height: 132' | Branch Length: 4' - 10'  
Branches Per Foot: 2.6 | Total Branches: 174  
Branches Start Height: 60' above ground level

### HARRISBURG, PENNSYLVANIA

Total Height: 80' | Branch Length: 4' - 10'  
Branches Per Foot: 3.1 | Total Branches: 111  
Branches Start Height: 40' above ground level

## Monopine Concealments

### They grow in all shapes and sizes.

While it's tempting to look at the monopine as a "cookie-cutter" concealment, variables like wind speed tolerances and the location's surroundings can dictate a more customized approach. But don't let the word "custom" scare you; STEALTH's manufacturing techniques are very efficient. One size doesn't really fit all and custom is more affordable than ever before.

Monopines are a great option for those sites requiring a multi-carrier solution and are designed to conceal as many carriers as necessary. We also design to accommodate any density (branches per foot) to meet any necessary zoning requirements. Our branches have been wind tunnel tested up to 130 mph and are manufactured using extremely durable FRP main branches with UV protected PVC sub branches and needles. Standard lengths vary for optimum coverage at 4', 6', 8' and 10'. Faux "bark", a factory applied texture, is available to add to the unconcealed portions of the "trunk".
