

STEALTH® Perforated Radomes

Look to STEALTH® to continue offering *cool* and aesthetically pleasing solutions! Our perforated metal radomes and RF friendly radomes are proven to be suitable for any small cell or DAS sites where radio installation is required. The radius shape of these radomes make them blend in well on any new or existing monopole. Two perforated sizes are available to meet your ventilation requirements; 1/8" and 1/4". These radomes can have a smooth or multi-sided appearance and be painted any customer specified color.
